Doctoral Studies

University of Sussex Business School – Science Policy Research Unit

Brighton, UK

PhD Programme in Science and Technology Policy Studies

Sep 2017 - Jan 2023

- Thesis title: ”Drivers and Impacts of Structural Change in Sub-Saharan Africa: Evidence from Households and Firms”
- Evaluation: Pass with minor corrections
- Supervisors: Dr Tommaso Ciarli; Prof Maria Savona
- Examiners: Prof Margaret McMillan (Tufts University – Massachusetts, United States, external); Prof Raphie Kaplinsky (internal)
- Description: The thesis collects four empirical contributions aiming to shed a light on the drivers and impacts of structural change in Sub-Saharan Africa, considering the role of informal activities in the process of structural transformation by looking at their complexity, geographical distribution, and relationship with technological change. The empirical analysis relies on a range of econometric and network techniques, bringing together several micro data sources on African households and firms, as well as geospatial data
